THE

FOUNDRY TRADE JOURNAL

(with which is incorporated THE IRON AND STEEL TRADES JOURNAL)

ESTABLISHED 1902

INDEX TO VOLUME LII

January to June, 1935

Head Office:
49, Wellington Street, London, W.C.2

XUM

Index to Volume LII

SUBJECT INDEX

A

Abrasive, a New, 204.
Abrasive-Cleaning Machine, a New Type of, 328.
Abrasive Cleaning Without Compressed Air, 128.
Accident Causation, Factors in, 204.
Akrill, C., & Company, Limited, Roll Foundry of, 75.
Alloy Cast Irons, 318
Alloying Elements on Behaviour of Steel in Case-Hardening, Effect of, 438.
Aluminium Alloys Exposed to Sea Water, 420.
Aluminium Alloys, Recent Advances in the Founding of, 201, 221, 255.
Aluminium Founding, Theory and Practice in, 255.
Aluminium Sand Castings, Unsoundness in, 185.
Aluminium, The Practice of Melting, 121.
American Foundry Industry in 1934, 32.
American Foundrymen's Association, Toronto Convention Programme, 426.
Arsenic on the Wear of Cast Iron, Effect of, 303.
Atomic Arrangement in Metals and Alloys, 354.
Automobile Castings by Welding, Some Notes on the Reclamation of Grey-Iron, 302.

B

Basic Requirements for Industry, 97.
Belgian Foundry Industry, 12.
Brass and Bronze, Deoxidation and Degasification of Red, 411.
Brass, Yellow, Deoxidation and Degasification of, 89, 126.
British Cast Iron Research Association, 237.
British Industries Fair, 349.
British Iron and Steel Federation, Annual Dinner, 224
Bronze Bushings, Porosity in Leaded, 377.
Bronze, Deoxidation and Degasification of Red Brass and, 411.
Bushings, Porosity in Leaded Bronze, 377.

C

Calculation of the Metal Changes for the Foundry Cupola, 435
Carbide Tools, 403.
Carbon Control, Cupola Practice and, 169, 252.
Carbon Steel, Free and Hindered Contraction of Cast, 217.
Cast Carbon Steel, Free and Hindered Contraction of, 217.
Cast Iron, Effect of Copper in Grey and Malleable, 402.
Cast Iron, Effect of Slag Composition upon the Structure of, 192.
Cast Iron for Vitreous Enamelling, 399.
Cast Iron in the Foundry, High-Duty, 57, 266.
Cast Iron Recovery in America, 136.
Cast Iron Report, Sheffield Discussion, 194.
Cast Iron, The Welding of Some Metallurgical Considerations, 313.
Cast Irons, Alloy, 318.
Castings, A Review of Factors Influencing the Soundness and Solidity of Grey-Iron, 295.
Castings by Welding, Some Notes on the Reclamation of Grey-Iron Automobile, 302.
Castings, Cause and Cure of Defects in Iron, 59, 77.
Castings, Making Sound, 252.
Castings, Uniformity in Finished, 158.
Castings, Unsoundness in Aluminium Sand, 185.
Charging to Tapping of a 30-cwt. Electro-Metals Electric Furnace, 90.
Chilled Cast Iron, 384.
Chilled Rolls, 416.
Chilling, Technique of, 249, 283.
Coal Dust, The Storage of, 386.
Coke, Recent Developments in Foundry, 3.
Coke Research, 410.
Cold-Blast Pig-Iron, Some Experiments in the Duplication of the Intrinsic Properties of, 137.
Commercial Moulding-Sand Control for the Tyneside Founder, 263, 281.
Complex Foundry Problems, 267.
Compressors, Motor-Driven Air, 365.
Contraction of Cast Carbon Steel, Free and Hindered, 217.
Conveying Equipment, Selecting Foundry, 72.
Coolers, Manufacture of Copper Tuyeres and, 113.
Copper Additions to Grey Cast Iron, 318.
Copper Agreement, 297.
Copper Curtailment Dangers, 332.
Copper Difficulties, 98.
Copper in Grey and Malleable Cast Iron, Effect of, 402.
Copper in Malleable Iron, Effect of, 93.
Copper Tuyeres and Coolers, Manufacture of, 113.
Copper upon Grey Cast Iron, Effect of, 182.
Coremaking, Simple Machine for, 122.

Correspondence :—

A New Society, 408.
American Foundry Conditions, 106.
Blowholes, 72.
Factors in the Economic Conduct of Vitreous Enamelling, 44, 72, 106, 152.
Ladle Design, 278.
Magnetic Separation, 182.
Magnetic Treatment of Enamel, 152.
Metallurgical Values, 120.
Sand-Blasting, 262.
Sand-Blasting Problems, 88, 136, 200, 216.
Storage of Coal Dust, 392.
The British Industries Fair, 54.
The Oldest Grey-Iron Casting, 44, 54, 200, 232.
Water in Sand, 120, 136.
Work Lost to the Foundry Industry, 376.
Costing, Foundry, 159, 285.
Costing Report, 190.
Cumming's Crucible Furnace, The, 437.
Cupola, Calculation of the Metal Charges for the Foundry, 435.
Cupola Mixtures, Separation of, 413.
Cupola Practice and Carbon Control, 169, 252.
Cylinder Liners, Heat-Treated Grey-Iron, 219.
Cylinders, Some General Remarks on Mechanised Foundries and the Making of Motor, 183, 205.
Czecho-Slovakian Foundry Industry in 1934, 23.

D

De-Enamelling, 384.
Defects in Iron Castings: Their Cause and Cure, 59, 77.
Defects in Steel Castings, Further Notes on, 139, 177.
Deoxidation and Degasification of Non-Ferrous Casting Alloys, 173.
Deoxidation and Degasification of Red Brass and Bronze, 411.
Deoxidation and Degasification of Yellow Brass, 89, 126.
Determination of Tensile Strength of Cast Iron by Special Test, 208.
Die-Casting, 90.

District Presidents :—

Mr. A. W. Walker (No. 15), 120.
Mr. William Walker (No. 16), 136.

Duplication of the Intrinsic Properties of Cold-Blast Pig-Iron, Some Experiments in the, 137.

E

Elastic Hysteresis in Cast Iron, Permanent Set and, 63.
Electric Furnace, Improved, 385.
Electric Pot Furnace for Melting and Heat-Treating, 100.
Electrometric Estimation of Molybdenum and Titanium, 434.
Employment in 1934, 98.
Enamelling Plants, Factors to increase Production in, 246.

F

Fox, Samuel, & Company, Limited, Works Description, 428.
Foundry Coke, 142.
Foundry Industry in 1934, Month by Month, 24.
Free and Hindered Contraction of Cast Carbon Steel, 217.
French Foundry Association, Election of Officers, 286.
French Foundry Industry, Recent Developments in the, 28.
Frit Kilns and Fritting, 299.
Furnace Practice, Rotary Melting, 155.

G

German Foundrymen's Association, Annual Meeting, 438.
German Iron Foundries in 1934, 49.
Glass by Water, Acids and Alkalis, The Weathering and Corrosion of, 325.
Grain Size and Growth, 100.
Green Sand Moulding in Cast Iron, Some Practical Hints on, 90.
Grey Cast Iron, Copper Additions to, 318.
Grey Cast Iron, Effect of Copper Upon, 182.
Grey-Iron Automobile Castings by Welding, Some Notes on the Reclamation of, 302.
Grey-Iron Castings, a Review of Factors Influencing the Soundness and Solidity of, 295.
Grey-Iron Cylinder Liners, Heat-Treated, 219.

670.5

H

Hadfields, Limited, The East Hecla Works of, 431.
Heat-Resisting Alloys, 147.
Heat-Treated Grey-Iron Cylinder Liners, 219.
High-Duty Cast Iron in the Foundry, 57, 266.

I

Impressions of American Foundry Practice, 96.
Ingot Moulds, Bottoms and Slag Ladles, 153, 175.
Institute of British Foundrymen :—
American Exchange Paper, To Present, 308.
Birmingham Branch, Annual General Meeting, 279.
Birmingham, Coventry and West Midlands Branch, Annual Dinner, 97.
Distinguished Service Recognised, 111.
Institute Elects New Members, 58, 286.
Lancashire and West Riding Branches (Joint Meeting), Visit to the Lancashire Foundry Coke Company's Plant, 142.
Lancashire Branch, Annual Dinner, 127.
Lancashire Branch, Annual General Meeting, 288.
London Branch, Annual Dinner, 39.
London Branch, Annual General Meeting, 270.
Middlesbrough Branch, Short Paper Competition, 90.
Programme of Annual Conference, 315.
Sheffield Branch, Annual Dinner, 112.
West Riding of Yorkshire Branch, Annual General Meeting, 324.
West Yorkshire Branch, Annual Dinner, 83.
Work of the Institute, 7.
Institute of Vitreous Enamellers :—
Annual General Meeting, 396.
Conference at Glasgow, 408.
Election of New Members, 278, 386.
Enamellers at Soho Foundry, 203.
Visit to Frit Works, 236.
Institute of Welding, Annual General Meeting, 420.
Intrinsic Properties of Cold-Blast Pig-Iron, Some Experiments in the Duplication of, 137
Iodine Method for the Determination of Oxides in Steel, 364.
Iron and Steel Institute, Annual Meeting, 309.
Isolated Foundry; its Advantages and Drawbacks, The, 22.
Italian Foundry Industry, 29.

K

"K" Monel Metal, 418.

L

Lead Situation, 83.
Leaded Bronze Bushings, Porosity in, 377.
Leaders :—
A British Foundry School, 277.
A Dead Horse, 245.
A Golden Jubilee, 323.
A Metallurgical Revival, 37.
A New Society, 359.
A Problem for the Economists, 425.
A Welding Amalgamation, 391.
Belgian Currency and Exports, 293.
Belgium and British Iron and Steel, 261.
Cast-Iron Research, 245.
Eliminating the Accident-Prone, 167.
Empire Iron and Steel, 151.
High Grade or Low Grade? 105.
Ingot Moulds, 151.
Machine Lighting, 53.
Moulded Iron, 71.
One Step Farther, 391.
Part-Time Education or Raising the Age, 135.
Permanent Moulds in the Bronze Age, 53.
Politics and the Technician, 199.
Reflections on the Welding Symposium—I, 293.
Reflections on the Welding Symposium—II, 307.
Review of the Foundry Industry of 1934, 1.
Shadow Boards, 341.
Smaller Still and Smaller, 71.
Standardising High-Duty Cast Iron, 135.
State Control in Industry, 37.
Surface Skin Metallurgy, 407.
Symposiums, 231.
The Bend Test, 231.
The Best of Everything, 277.
The British Foundry School, 425.
The Case of the Small Foundries, 105.
The Enamelled House, 87.
The Fatigue of Cast Iron, 199.
The Federation Dinner, 215.
The Foundry Exhibition, 215, 261.
The History of Cast Iron—I, 341.
The History of Cast Iron—II, 359.
The History of Cast Iron—III, 375.
The Home Office and the Factory, 167.
The Iron and Steel Tariff Position, 181.
The Sheffield Conference—I, 307.
The Sheffield Conference—II, 323.
The Steel Cartel, 407.
The Welding Symposium, 181.
Then and Now, 375.
Trade Prospects, 119.
Trading Nationally, 87.
Wear and Tear, 119.
Leaves from a Foundryman's Notebook, 415.
Light-Alloy Castings Industry in 1934, 21.
Light-Castings Industry in 1934, 30.
London Iron and Steel Exchange, Annual Dinner, 114.

M

Malleable-Iron Foundry Industry in 1934, 4.
Manganese Bronze, 45.
Mechanisation of Foundries, Recent Developments in the, 15.
Mechanised Foundries and the Making of Motor Cylinders, Some General Remarks on, 183, 205.
Melting Aluminium, The Practice of, 121.
Metal Exchange Activity, 368.
Metal Spraying in the Foundry, 209.
Metal Spraying of Cores and Castings, 187, 209.
Metallurgical Research, 130.
Mould-Drying Processes, The Control of, 393.
Moulding an Air Cylinder, 415.
Moulding-Sand Control for the Tyneside Founder, Commercial, 263, 281.
Multi-Casting Process, A New, 397.

N

Non-Ferrous Castings, Some Factors which Influence Soundness in, 345, 367.
New Foundry Product, 279.
Newton Chambers & Company, Limited, Works Description, 430.
Nickel Cast Iron for Sewage-Disposal Plants, 239.
Nickel Demand Continues, 236.
Non-Ferrous Casting Alloys, Deoxidation and Degasification of, 173.
Non-Ferrous Foundry Industry in 1934, 11.
Non-Ferrous Metals in 1934, 26.
Norbide—B_4C, 417.

O

Oxides in Steel, The Iodine Method for the Determination of, 364.

P

Paper-Machine Rolls, 168.
Patternmaking, 343, 383.
Patternmaking, A Discussion on, 366.
Patternmaking Economics, 333.
Permanent Set and Elastic Hysteresis in Cast Iron, 63.
Pewter, Cast, 379.
Pig-Iron Industry in 1934, 25.
Pig-Iron, Some Experiments in the Duplication of the Intrinsic Properties of Cold-Blast, 137.
Pipe-Dipping Plant, 273.
Pipette Method in the Fineness Test of Moulding Sand, Use of the, 409.
Planning, Some Observations on Foundry, 342.
Plant, Lay-Out and Production, Some Aspects of, 107, 123, 145.
Porosity, Function of the Steel-Foundry Foreman in Preventing, 329.
Porosity in Castings, The Preparation of Steel to Avoid, 361.
Porosity in Leaded Bronze Bushings, 377.
Porosity in Steel Castings, The Mechanics of, 254.
Production, Some Aspects of Plant, Lay-Out and, 107, 123, 145.
Propellers, Modern Marine, 233.

R

Radiator and Boiler Foundry Installs New Sand-Preparing Plant, 81.
Reclamation of Grey-Iron Automobile Castings by Welding, Some Notes on the, 302.
Red Brass and Bronze, Deoxidation and Degasification of, 411.
Refractories Industry during 1934, Commercial and Technical Developments within the, 19.
Refractories in the Foundry, 351.
Refractory Bricks for Reheating Furnaces, 392.
Research for the Foundry Industry in 1934, 13.
Roll Foundry of C. Akrill & Company, Limited, 75.
Rolls, Composite, 298.
Rotary Magnetic Separator, Small, 413.
Rotary Melting-Furnace Practice, 155.

S

Sandblasting, 55, 91.
Sand Castings, Unsoundness in Aluminium, 185.
Sand Control for the Tyneside Founder, Commercial Moulding, 263, 281.
Sand Mixing and Aerating, 302.
Sand-Preparing Plant, Radiator and Boiler Foundry Installs New, 81.
Sand, Use of the Pipette Method in the Fineness Test of Moulding, 409.
Scrap Importers' Difficulties, 111.
Scrap Metal Outlook, Better, 354.
Scrap Situation, 266.
Selecting Foundry Conveying Equipment, 72.
Sheepbridge Stokes Centrifugal Castings Company, Limited, Works Description, 429.
Sheffield, The Foundry and the Machine Age, 112.
Sheffield Works Open their Doors to Conference Visitors, 427.
Shipbuilding, Marine Engineering and the Foundry Industry, Developments in, 5.
Silicosis and the Minerals Causing it, 191.
Sintering, Modern, 403.
Slag Composition upon the Structure of Cast Iron, Effect of, 192.
Sodium Carbonate in Iron and Steel Works, The Use of, 235.
Soundness and Solidity of Grey-Iron Castings, A Review of Factors Influencing the, 295.
Soundness in Non-Ferrous Castings, Some Factors Which Influence, 345, 367.
Speech Day in Manchester, 127.
Spelter Situation, 168.
Spraying of Cores and Castings, Metal, 187, 209.
Steel Castings, Essentials in the Production of Sound, 253.
Steel Castings, Further Notes on Defects in, 139, 177.
Steel Castings Industry in 1934, 9.
Steel Castings, The Mechanics of Porosity in, 254.
Steel Foundry Foreman in Preventing Porosity, Function of, 329.
Steel Foundry Industry in Australia, 30.
Steel, Peech & Tozer, Templeborough Works of, 427.
Steel, The Iodine Method for the Determination of Oxides in, 364.
Steel to Avoid Porosity in Castings, The Preparation of, 361.
Steels for Die-Casting Dies, 47.
Steels, Strength in, 280.

T

Technical Committee, The Work of the, 382.
Testing of Foundry Sand for Permeability, 90.
Tin, Outlook for, 126.
Tradesman? What of the Future, 271.
Transmission Machinery, 208.
Tuyeres and Coolers, Manufacture of Copper, 113.

U

Uniformity in Finished Castings, 158.
United States Steel Industry, 62.
University of Sheffield, Department of Metallurgy, 432.
Unsoundness in Aluminium Sand Castings, 185.

V

Vitreous Enamelling, Cast Iron for, 399.
V.S.K. Machine, 303.

W

Wear of Cast Iron, Effect of Arsenic on, 303.
Weathering and Corrosion of Glass by Water, Acids and Alkalis, 325.
Welding as Applied to the Foundry Industry, Recent Developments in, 18, 41.
Welding of Cast Iron; Some Metallurgical Considerations, 313.
Welding, Some Notes on the Reclamation of Grey-Iron Automobile Castings by, 302.
Welding Subjects, The Need for Standardisation and Uniform Thought in, 336.
Welding Symposium, Summary of the Papers (Group 1), 369.
Wiggin, Henry, & Company, Limited, Centenary, 294.
